

THE NEXT GENERATION OF RIM

Traditional RIM stores information. Intelligent RIM understands it.

For years, RIM has been about managing documents, data, deadlines, and workflows. **That's no longer enough.**

RegDesk Intelligent RIM brings AI and regulatory intelligence directly into the workflow — helping teams understand requirements, find answers, automate work, generate content, and make faster regulatory decisions.

Not AI **bolted onto** legacy RIM.
Intelligence **built into** the way regulatory work gets done.

AI-POWERED WORKFLOWS

REGULATORY INTELLIGENCE

FASTER DECISIONS
